Tom Syvertsen Named Vice President at Mueller Associates

Baltimore, MD—January 10, 2023

Mueller Associates, an award-winning mechanical, electrical, and plumbing engineering firm, has announced that Tom Syvertsen, PE, LEED AP, joins the firm's executive team as a vice president. Syvertsen, who joined the Baltimore-based firm in 2002, has overseen many of the firm's largest and most complex projects in the cultural, institutional, and historic preservation markets.

As vice president, Syvertsen will oversee multidiscipline engineering teams and take a hands-on role in various projects. His experience includes large-scale, multi-phase design projects such as the modernization of the Smithsonian's National Air and Space Museum in Washington, D.C., the new University of Maryland, Baltimore County Performing Arts & Humanities Building, and the Graves School of Business and Management at Morgan State University in Baltimore. Syvertsen also helped engineer the Thomas Jefferson Visitor Center and Smith Education Center at Monticello in Charlottesville, Va.

Syvertsen is a 2002 graduate of Messiah College, where he earned a Bachelor of Science in Mechanical Engineering. He is a registered professional engineer, a LEED Accredited Professional, and a member of the Baltimore chapter of ASHRAE.

"Throughout his 20 years with Mueller, Tom has played an instrumental role in the design and renovation of many high-profile, challenging projects," says Todd Garing, PE, LEED AP, president and CEO of Mueller. "Architects and owners trust his engineering expertise and ability to manage projects with stringent requirements. As group manager, he will bring his knowledge and years of experience to various projects, guiding our design teams and collaborating closely with clients."

About Mueller Associates

Established in 1966, Mueller Associates delivers mechanical, electrical, plumbing, and fire protection engineering services for cultural facilities, museums, higher education institutions, libraries, performing and fine arts centers, historic preservation, government facilities, and other institutional and corporate facilities. Mueller specializes in engineering solutions for complex and stringent environmental control and energy conservation. The firm is a leader and innovator in sustainability and resilience.

Current and recent projects include the renovation of the historic Hirshhorn Museum and Sculpture Garden in Washington, D.C.; the new Capital One Hall in Tysons, Va.; George Mason University's new Fuse at Mason Square in Arlington, Va.; the Fernandez Family Center for Innovation and Collaborative Learning at Loyola University in Baltimore; the renovation of Carrington Hall at the University of North Carolina's Nursing School in Chapel Hill, N.C, and numerous projects for Northrop Grumman Corporation throughout the Baltimore-Washington region.
